Palimpsest

Every document has a second layer.

A palimpsest is a manuscript scraped clean and rewritten. Traces of the earlier writing remain.

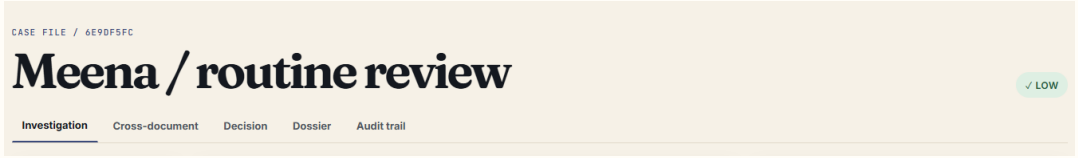

BUILT BY HANNIELVINU

Meena and Ravi

LOW CONCERN

Meena

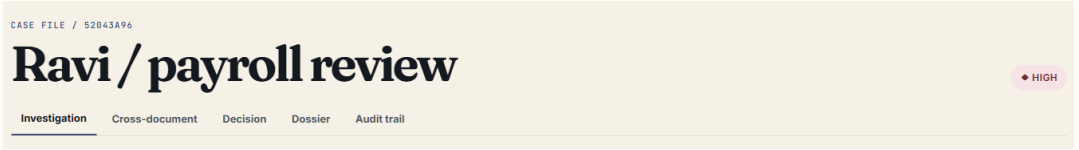

A blurry scan, an initial and a normal payroll delay.

HIGH CONCERN

Ravi

A payslip amount that conflicts with the credit and an earlier PDF revision.

All sample data is synthetic. No real personal data.

Reading and verifying a payslip

OCR reads a value.

A reviewer needs to know what corroborates it.

Compare the payroll arithmetic, the bank credit and the document's own history.

OBSERVED ON THE PAYSLIP

Which source supports this amount?

From originals to evidence

HUMAN REVIEW

Clear, request more documents, or escalate with a reason.

Peel the Layer

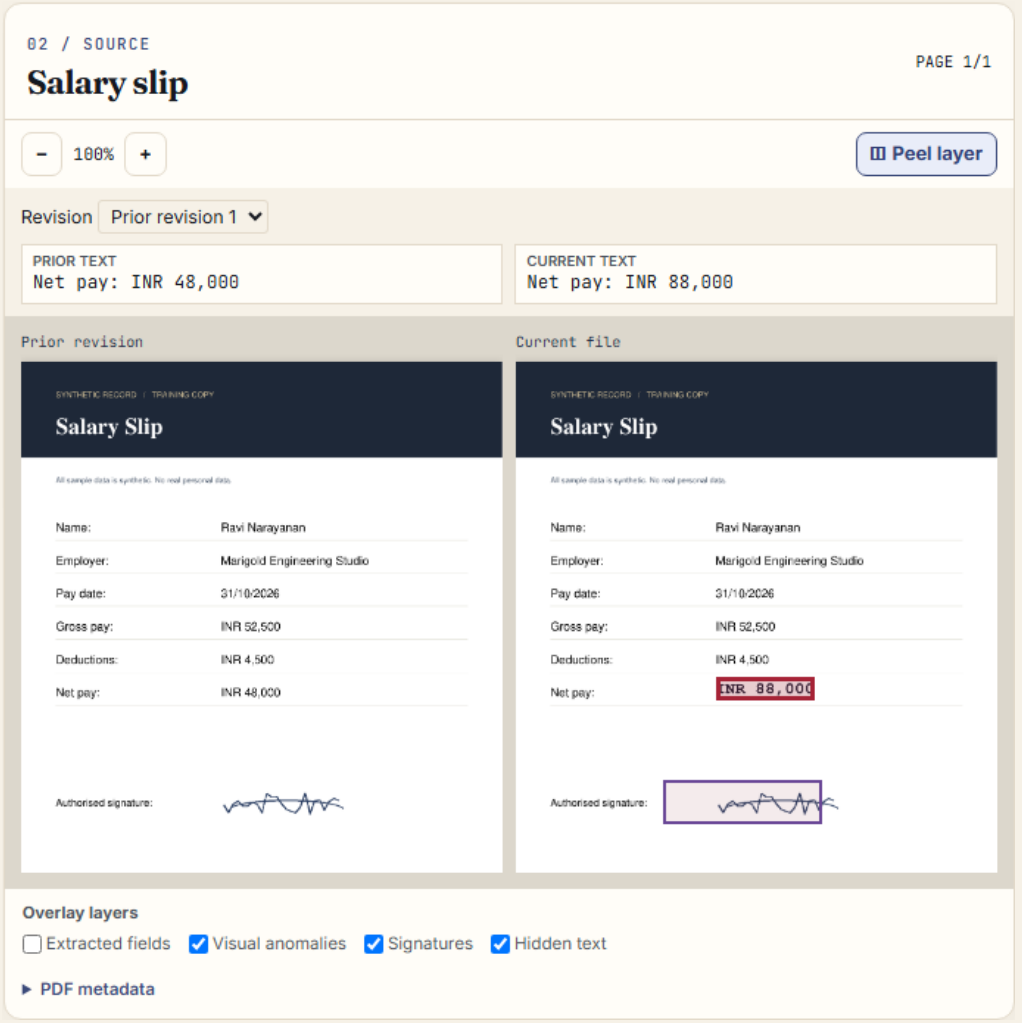

CURRENT AMOUNT

INR 88,000

Gross pay:	INR 52,500
Deductions:	INR 4,500
Net pay:	INR 88,000

Prior net pay recovered

INR 48,000 · The earlier bytes survived an incremental save.

The bank credit and the next step

PAY-CYCLE CONFLICT

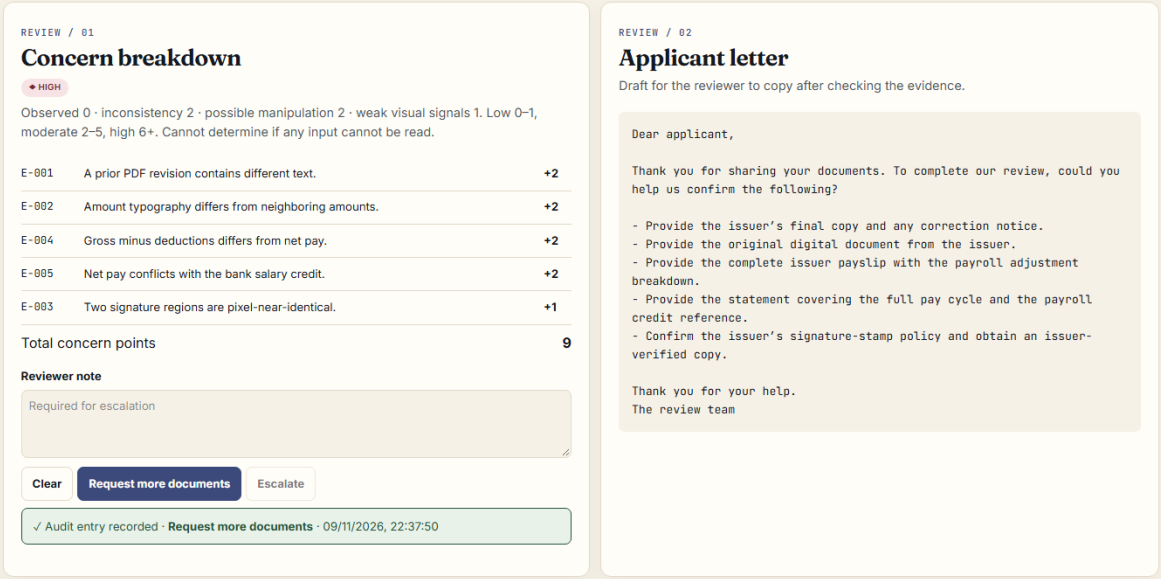

The bank credit matches the prior amount.

Payslip INR 88,000 · Bank INR 48,000

Net	INR 88,000	—	Mismatch
Salary credit	—	INR 48,000	Mismatch

A bonus, split credit or correction could explain the difference.

Genuine cases flagged

1 / 5

Rotated scans flagged

The hidden instruction surfaced as evidence. The review stayed pending.

Implemented	Revision recovery and audit	**Partial**	Visual and text heuristics
Planned	Blind evaluation	**Unsupported**	Flattened history recovery

RUBRIC COVERAGE

OCR & Information Extraction · Document Understanding · Visual Forensic Analysis · Contextual Intelligence
Evidence & Traceability · AI Reasoning & Explainability · Technical Implementation · Innovation

Synthetic, self-generated; a blind human-tampered set is planned.

What we'll verify next

Blind evaluation

Add independent documents and measure by detector.

Scan and layout coverage

Improve rotation handling and broaden labeled templates.

Stronger custody

Isolate native parsers and checkpoint the audit chain.

Source repository

github.com/hannielvinu/Palimpsest

Public demo deployment pending

Flattened PDFs lose recoverable history.
